

Advance Social Trading Platform

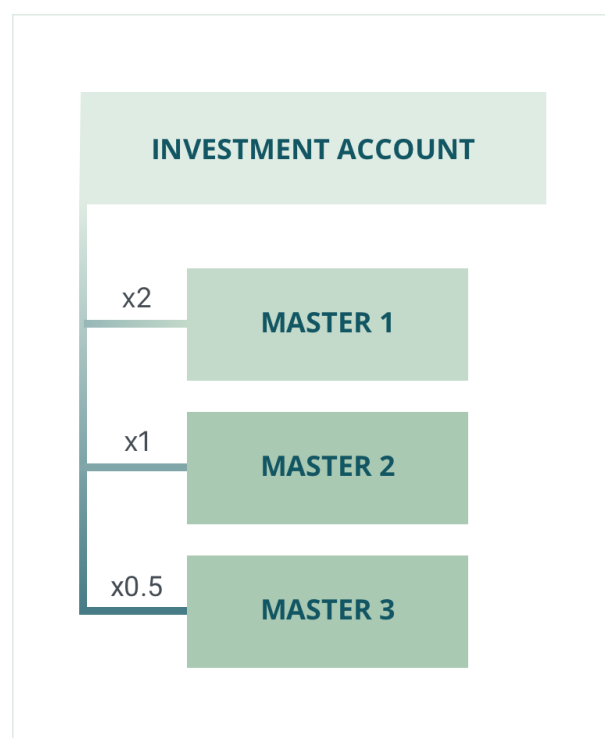

****Account type in manager's app is called****

- Signal Provider (**For Master**)
- Signal Receiver (**For investor**)

Main features

- Investor can copy trades from several signal providers simultaneously
- Investor can subscribe and unsubscribe from signal provider without help from Black River Markets side.
- Subscription and Unsubscription can be made within seconds by investor without approval of trader
- Investor can make his own trades on investment account
- Deposits / Withdrawals are immediate on investment and master accounts
- Investor can partially / fully close positions of money managers

Allocation of positions in social trading

- Investment account and master account are separate accounts.
- Trades that are opened on investment account don't affect master account.
- In social trading only ****"Proportionally by Equity x Ratio"**** allocation method is available.
- Risk Ratio = parameter that

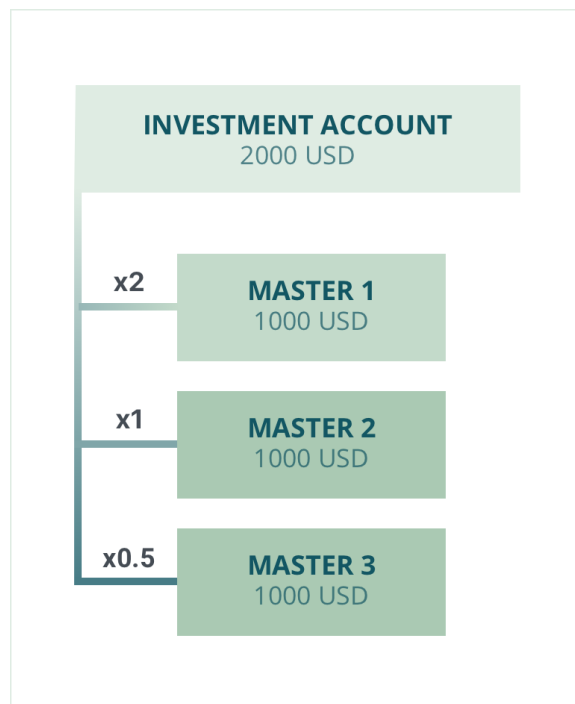

****Formula for calculation of investor's position size for social trading****

Position of investor = Master position x (Investor's Equity / Master's Equity) x Risk

****Example for calculation****

All masters have 1000\$ on their accounts and investor has 2000\$.

- When master #1 opens 0.5 lot EURUSD, 2 lots are opened on investment account because he has ****2 times more money**** plus ****x2**** ratio multiplier ********(0.5 lots x (2000USD/1000USD) x 2)
- When master #2 opens 0.5 lot EURUSD then 1 lot is opened on investment account.
- When Master #3 opens 0.5 lot EURUSD then only 0.5 lot is opened on investment account

Where investor can change ratio for his account

Investor can change ratio for his investment account on a subscription page in My accounts section.

The screenshot shows the 'Subscriptions' section of a trading platform. The interface includes a header with the account name 'Investment account n...' and a dropdown menu. Below the header are navigation tabs: Subscriptions, Trading report, Deposit, Withdraw, Settings, and Statistics. The 'Subscriptions' tab is active, showing a table with 2 subscriptions. The 'Ratio/lot' column is highlighted with a yellow box, showing a value of 1 for both subscriptions. Below the subscriptions table is the 'Open positions' section, which shows 1 order. The 'Account status' section at the bottom displays the account balance, equity, and free margin.

Master login	Status	Ratio/lot	Open positions	Fees
10676	Subscribed	1	1	View Unsubscribe
900030	Subscribed	1	0	View Unsubscribe

Order	Master Login	Type	Symbol	Lot	Open time	Open price	Close time	Current price	Swap	Profit
9049516	10676	Buy	AUDCAD#	0.24	18.05.18, 11:29:12	0.96284	-	0.98123	0.35	340.03

Account status	Balance	Equity	Free margin
	\$10,000.00	\$10,337.02	\$10,156.78

Min lot setting

Sometimes investor has a small deposit or signal provider trade very small lot and projected size of position that should be opened on investment account is lower than minimal lot allowed on a server

****For example****

Master position x (Investor's Equity / Master's Equity) x Risk Ratio < 0.01 lot for EURUSD).
For opening position even in such situations, he can activate option "always open min lot".

You can find a checkbox "open min lot" above on a screenshot.
